

STUDY SHOWS TRANSCONDYLAR BONE SCREWS AND KIRSCHNER WIRES ARE AN EFFECTIVE FRACTURE TREATMENT

Study shows transcondylar bone screws and Kirschner wires are an effective fracture treatment. A study by orthopaedic Specialist Steve Butterworth at Weighbridge Referrals in Swansea has shown that using a combination of transcondylar bone screws and Kirschner wires (K-wires) to treat humeral unicondylar fractures in puppies younger than seven months old results in high healing rates with few complications.

VIVALDIS LAUNCH ONCOLOGY SEGMENT

Vivaldis is well known for bringing the latest and most innovative products to the Indian veterinary market and in keeping true to this mantra, has introduced a whole new vertical of animal healthcare.

Vivaldis unveiled its foray into Veterinary Oncology at the 21st WSAVA CE INDIA event in Mahabalipuram. The event was organised by SAPAC-TN and WSAVA and hosted over 800 participants.

Vivaldis launched a group of products including Toceranib, Maropitant and an Onco Support Diet at the event, making it one of the most comprehensive oncology ranges in India.

CID MEDICATION FOR DOGS GETS FDA RENEWAL

The FDA has renewed approval for Canalevia-CA1 (crofelemer delayed-release tablets), a plant-based oral medication for managing chemotherapy-induced diarrhoea (CID) in dogs. Manufactured by a USA-based Animal Health company, the medication is derived from the Croton lechleri tree and can be administered at home twice daily.

With one in four dogs developing cancer and six million new canine cancer cases estimated annually in the U.S., CID is a common side effect of chemotherapy, impacting treatment outcomes. The need for such products emphasizes the importance of addressing this overlooked medical need to improve the quality of life for both animals and humans undergoing cancer treatment.

November 6, 2024 – AVMA

Vivaldis was proud to be the Gold Sponsor of the 21st WSAVA CE India, held in Chennai from 15th to 17th November 2024. The event provided an excellent platform to launch our innovative oncology portfolio, engage with veterinarians, and build a "Tree of Hope" to strengthen the fight against pet cancer.
